

Physician Information Sheet Allergy and Other Injection Orders

Allergy Immunotherapy:

Patients requesting to have their allergy immunotherapy administered by the Wilce Student Health Center personnel should understand that we only offer this service in accordance with their doctor's written and signed orders. The online form provides us with this order. Your patients will not be seen or evaluated for this problem by the Wilce Student Health Center physicians, although students may schedule appointments for the purpose of receiving symptomatic treatment if they wish. Our nurses have standing orders for emergency situations in the event of adverse reactions. Should such a problem arise, our physicians are available for appropriate emergency treatment as necessary.

Please print out and complete the Administration of Allergy Immunotherapy form found on our website at <http://www.shc.osu.edu/services/allergies-injections-immunizations/allergy-injections/> and either

- Fax: (614) 247-8288
- Mail: Wilce Student Health Center
The Ohio State University
1875 Millikin Road.
Columbus, Oh 43210
- In Person: bring the form to the Wilce Student Health Center 2nd floor front desk

Our nurses will not administer allergy injections until this form is received. Please call (614) 292-5729 with any questions about this form.

Allergen vials can be sent with the patient or can be mailed directly to our facility. These are stored in our Injection Therapy area and the student may request that vials be released to them as needed for injections during times away from the university. If a student fails to appear for injections for more than 90 days, the vials will be placed on hold and either returned to the ordering physician or discarded.

Other Medication Injections:

Wilce Student Health Center requires an assessment by one of our providers for the administration of other injectable medications. This is to promote appropriate quality control and safety for our patients. Students receiving ongoing medication injections are advised to schedule an appointment with a provider by calling (614) 292-4321. Documentation of the underlying diagnosis and previous treatment will be needed and the student should have that information available at the time of their appointment with our provider. For certain high-risk injectable medications, the provider may need to refer the patient to an appropriate local consultant for further evaluation and/or administration of that medication.
